Step by Step Manufactured Home Installation!

Reposting with audio fixed! This video explains the entire process of setting up a manufactured home. There is a lot of work to do between the time the home is delivered to the lot and the time it's ready for the new homeowners to move in. Follow me on instagram for more: instagram.com/kerrytarnow/ The first thing that to be done when the new manufactured home is delivered is to unload it on to blocks. Depending on the truckers schedule they will either unload it on temporary blocks or the permanent blocks if they have time. If the home is unloaded on to temporary blocks it's up to the set up crew to lower it on to permanent blocks with jacks, that process takes a couple hours. After the new manufactured home is on blocks the set up crew can start the skirting, landscaping can begin, the plumber can start hooking up the sewer/water and the electrician can run the tech cable into the panel. The delivery days of manufactured homes are often changing because of weather, road conditions or factory delays so it's rare that all of the contractors are scheduled to come on the day the home arrives. The whole process of setting up a manufactured home takes about a week from start to finish on average, no two jobs are the exact same so it varies. Next week I'm doing a home tour of this new 1,056 sq ft home, Subscribe to my channel so you don't miss it. Thanks for watching!
