How to Install Attic Insulation: Blown-in Cellulose using Home Depot Rental Machine DIY

The attic is by far the most important space to insulate in the house. Lower your energy bills and save energy by following these easy steps to insulate your attic using cellulose insulation. Whether insulating a new construction or adding insulation to your attic, cellulose insulation is better than fiber glass insulation – see all the benefits in the video. We bought the materials at Home Depot and got a free rental when you buy 10 or more bags – Izza and I will show you how to calculate how much insulation you need in your attic and how much to order. We will run you through all the essential gear you need. We check out what prep is needed as well as how to shoot the insulation in the attic, and then give you a few more tips and tricks on the whole process! I hope you can tell we had fun making this PUBG gaming inspired video. This home depot insulation machine is awesome and easy to use for blown-in insulation. We're using Thermoshield loose fill insulation and we'll give you a bunch of attic insulation installation tips along the way which will make your home more energy efficient as possible. Two Blow-in Insulation options at Home Depot

Your choices are "GreenFiber" Cellulose Blown-In insulation, or "AttiCat" Fiberglass Blown-In insulation by Owens Corning. I

made this just to give people a heads up on the insulation options at Home Depot. Lowe's has a similar option. If you get a handyman or contractor to blow in the insulation, chances are he will blow in the cellulose insulation. Its shredded up newspapers and phone books, at least 80%. If you like to "recycle" then use that one. I think the fiberglass is much better because it does not compress over time as much. However, professional installers may ad a starch glue if they are blowing it into vertical spaces like wall cavities. The glue helps it hold its position. So if you are hiring out be sure to ask the exact process they use. Late October/Early November Lowe's and Home Depot both have the fiberglass on sale at 20% off. So it would be worth it to hold out for the sale if possible. To see what Lowe's has click this link: [youtube.com/watch?v=Vs2ombFYx5M](https://www.youtube.com/watch?v=Vs2ombFYx5M)

DIY Spray Foam Insulation - What You Need to know Before You Start

I Used the Tiger Foam Quick Cure closed cell foam Formula – 600 Board Foot Spray Foam Insulation Kit. The key to this project is prep. Make sure you have everything you need to start and finish the job before you pull the trigger. I suggest watching this video and a few others before purchasing the material for your project.
