### Cracking your old Sentry Safe (without destroying it)

A friend of me lost the combination to his safe and asked me to open it. I like a challenge so I gave it a try, with success: an open safe and a retrieved combination. This video describes my approach to open the Sentry Safe by John D. Brush & CO Inc. Rochester, New York U.S.A. If you lost the combination and you want to get it open again, this video might be the solution to your problem. Thanks to the great comments I recieved I now assume the normal dialing sequence is left-right-left (counterclockwise-clockwise-counterclockwise). In the video I start with right (right-left-right). That works too if you want to crack the code. However if you already have one or more numbers, I recommend you start with left as the first turn (3x), then right (first until "click", then to the number, then left to the number. Don't overshoot the numbers; if you do, restart at first turn left (3x), etc. Good luck! PS: i changed the current combination of this specific safe, so the combination in the video is not valid anymore.

### How To Rust Proof Your Car - ValuGard Rustproofing

Rust Preventive Installation Procedures. Wax based, amber, anti corrosive formula installed using the no-holes-drilled atomizing method. Exceeds ASTM-B117. Outstanding corrosion protection and crevice penetration. Simple to install using the proven effective atomizing method of application. Preserves the vehicle body from expensive and dangerous rust through. No holes drilled means no destruction of the factory paint film, no compromise to the structural integrity of the vehicle.
