However, the gaps in the knowledge base related to state of the physical environment and home health are wide enough to drive a truck through. Most of what people think they know is based on practice rather than evidence. After three decades of debate, there are few empirical data and a general lack of psychometrically sound measures (Gitlin ...

How Much Does A Physical Therapist Make in 2021 Is Physical Therapy School Worth The Investment

How much does a physical therapist earn in 2021? A physical therapist's income is largely dependent on the work environment you choose. Home health therapists and travel therapists earn the most on a per hour basis while treating patients. Outpatient orthopedic therapists usually earn the least on an hourly basis. But if you love what you are doing and can afford to live on the salary you are earning then this may be one of the most rewarding careers available. Home health physical therapists usually earn the highest income per visit. But travel costs and time must be calculated in your per visit rate. Skilled nursing physical therapists are paid upwards of \$80,000 per year. Outpatient orthopedic and sports medicine physical therapists tend to be paid the least largely because the competition for those jobs is high and reimbursement is low.
