Follow us and learn more about our cutting-edge modular earth-bermed homes that provide a revolutionary new way to live in total integration with nature. Come visit us in Marietta, GA (North of Atlanta)

GREEN MAGIC HOMES - SAVE YOUR MONEY

We are now, as of June 2016, fully supported by Nova Scotia and the City of Halifax! The actual rate of building cost FROM NEW is ONLY \$91/sq ft! So for a 2000 sq ft(4 bedroom/4bath) building on a full basement with HVAC, plumbing, electrical, windows and doors and it's ONLY \$182 000! Any home comparable is double this cost! We also can provide sustainable solutions to water and waste management and off the grid technologies like with the Tesla Power Wall. Not to mention slow growing grass, moss, mint or thyme to easily cover the homes in a hassle free plant. I'm sure you want to find out more so contact any of our friendly staff at: facebook.com/greenmagichomesns/

Consulting: aaronmarino.com Pete & Pedro: peteandpedro.com MENfluent Media: menfluent.com MENfluent Conference: menfluentconference.com/ Tiege Hanley: tiege.com Ollie: olliesmile.com Field trip! In this video men's style, grooming, fitness and lifestyle expert, Aaron Marino of IAmAlphaM, AaronMarino, and Pete & Pedro found these cool homes while out running. He found this hobbit house, posted the picture on Instagram, and then met the owners. Now he's giving you a tour! After the tour, he interviews the distributors of the homes. The homes are green and sold throughout the US & Canada. They are manufactured shells that are assembled based on plans. You can make them as big as you want, and no matter the size, they feel spacious due to the 11 foot ceilings. Luxurious but affordable, the homes are constructed from fiberglass that is slightly more expensive than lumber but extremely durable. They are tornado and hurricane proof, covered by earth outside. It's like super sexy bunker. You can even grow organic vegetables in and outside of your house! Alpha loves the amount of windows — so much light. And they are energy efficient. They are focused on getting everything green. Alpha gets a tour of the Smartflower solar too — powering up to 2,000 square feet. It's important to go green — we need to give back to the planet and stop wasting resources. Make an effort. Their mission is all about housing that lasts, is maintenance free, and has systems with less waste & money. The ultimate goal is as minimal impact on the planet as possible.

Green Magic Homes Today

For hundreds of years, all over the world we've been living in earth covered homes. Today we can have all of the modern luxuries with the benefits of mother earth as insulation. These well-lit sustainable homes are approved for construction ANYWHERE an ordinary home can be built(PROVINCE WIDE)! We have many prototypes and are able to customize homes/floor plans to your liking within days. Green Magic Homes can be built within a weeks time, usually taking about 3 days. When you can have a home twice the size for half as much... do yourself a favour and check this option out! Not to mention the cost of living is much lower. The actual rate of building cost FROM NEW is ONLY \$91/sq ft! So for a 2000 sq ft(4 bedroom/4bath) building on a full basement with HVAC, plumbing, electrical, windows and doors and it's ONLY \$182 000! Any home comparable is double this cost! Why settle for a fixer-upper when you can build a fully sustainable, custom home for less? Green is In - These Prefab Eco Homes Leave a Small Carbon Footprint

Get the Big Book of Tiny Homes bit.ly/3fHTpqG Get the Log Home Planbook bit.ly/3f8RBbs More information on this video can be found here: hyggehaus.com/green-is-in-these-prefab-eco-homes-leave-a-small-carbon-footprint-.html - - - - Green is In - These Prefab Eco Homes Leave a Small Carbon Footprint The Sardinia Tunnel Home is a 524 square foot eco building with two bedrooms and one bathroom. This eco-building design offers you the freedom of living a more natural lifestyle, by giving you smarter home solutions to your everyday challenges. With an eco-conscious home design, this tiny house leaves a small footprint and makes a huge positive impression. Some of the advantages of these eco buildings are its high efficiency and energy saving construction, eco-friendly manufacturing, fast and easy assembly, fairly and full of natural light inside, reduces the heating and cooling bills and maintenance, the GMH structure is a perfect waterproof barrier. Other benefits of these prefab eco buildings include the green roofs and walls, passive solar design, carbon footprint reduction, modular construction system consisting of a lightweight, strong shell, aerospace building materials, resistant to corrosion and damage from the weather and the endless range of possible variations in design. These modern prefab tiny house designs are smart, modern and creative. They are efficient and functional organic spaces. The prefab eco homes are completely waterproof, with clean, modern lines. Green Magic Homes have built the tiny prefab houses with modular components manufactured with the latest generation of fiber reinforced polymer technology. The modern eco homes are available at reasonable prices, offering infinite home design possibilities and comfort, with quick assembly and total security at an engineering and construction level. Eco-Friendly Construction. The eco buildings are built from high tech building materials with exceptional durability results in less environmental impact versus regular house construction. Energy Efficient. By having low energy requirements along with high energy standards, these prefab eco buildings use up to 70 percent less energy versus conventional home designs. Spacious Environments. The prefab tiny house buildings have open layouts, large windows to let in plenty of natural light, arched ceilings, and courtyards that provide a spacious and ample feel even in the smallest of unit sizes. Lush Vegetation. You can pick a flower, a vegetable or fruit from your window, enjoy the butterflies around your eco house and feel nature all around you. These aesthetically pleasing eco homes offer a unique option in home designs. Green Magic Homes uses the latest generation components of prefab in fiber reinforced composites. Green Magic Homes offer certified technology, with Structural Engineering calculations developed in the USA, Europe and South America, which meets all of the international standards to be approved and built in any country in the world. Green Magic Homes have designed a new kind of eco-building living environment. These spacious, calming and illuminated interior tiny house spaces are perfectly designed to integrate with the beauty of nature, surrounded by lush vegetation. The Green Magic eco buildings are covered by soil and some rich greenery, to make them energy efficient and energy saving while managing to keep the temperature balanced inside which helps to foster restful sleep and rejuvenation. These eco buildings allow you to embrace a lifestyle that calms your senses, fills you with joy, and inner peace while keeping you connected nature.
