Home Health Aide Salary | How Much Money Does a Home Health Aide Make

Home health aides provide routine individualized healthcare such as changing bandages and dressing wounds, and applying topical medications to the elderly, convalescents, or persons with disabilities at the patient's home or in a care facility. Home health aides also monitor or report changes in health status, and sometimes provide personal care such as bathing, dressing, and grooming of patient. There are no formal education requirements for home health aides, but most aides have a high school diploma. Home health aides working in certified home health or hospice agencies must get formal training and pass a standardized test. registerednurses.com/home-health-aide-salary-how-much-money-does-a-home-health-aide-make/

The Rewards of Being a Home Health Aide

Being a home health aide for BAYADA, Kimberly Grehan loves her job and would do more of it if she could (and she already works seven days a week!). That's what work is like when you're working for a company whose purpose is to help people and make a difference. And that's BAYADA. Founder, Mark Baiada feels incredibly fortunate to have found this field of work, and he's so appreciative of the caregivers who work with him. Interested in a career at BAYADA? Fill out this 30-second form: bit.ly/2CeKiLP Kimberly's been with BAYADA for seven years. She found the company through a nurse friend who

encouraged her, saying she'd be a good fit as a home health aide. It turned out that her friend was right. Kimberly takes care of her clients the way she'd want someone to take care of her parents. In her opinion, no one should be in a nursing home if they don't want to be. If someone wants to be in their home and have care, they should be, and that's what does. It's more than care: it's getting to know your clients. For Kimberly, it's like she's joking around with her best friends. Even though she works a lot, she'd work more if she could squeeze more hours out of the week. If this work sounds appealing to you, you may be the kind of person who could be a home health aide. Working at BAYADA, the lives you touch and change will make a difference in your own. Have any questions about our services? Fill out this form to have a representative reach out to you today: bit.ly/2BixfHG

A Day in the Life of a Home Health Aide

CAREGIVER & CNA JOBS, TRAINING, & SCHOLARSHIPS - LEARN MORE @ myCNAjobs.com A Day in the Life of a Home Health Aide Hi there and welcome to our career training series. I'm [NAME] and I'm one of the team members here at myCNAjobs. Every day working as a caregiver can be a little bit different, but I'm here today to give you a peek into what a day in the life of a caregiver looks like. Getting to know your clients: • Each client you work with will be a little different. When you meet a client for the first time, ask questions about them. What do they like? What are their interests? Try to learn about their lives. This will help you break the ice and get to know them on a personal level so you can build a relationship. Activities of Daily Living - or ADLs • Activities of daily living, or ADLs as they're often called, are everyday tasks that your clients need help with. They may be things you and I would take for granted like cooking, light housekeeping, laundry, bathing, or other similar tasks. Sometimes a client needs help getting to and from appointments or the store, and sometimes they just want some companionship during the day. Shift times • When working as a caregiver, different clients will have different care needs. This means the length of your shifts will change, too. Some clients may only need a little help for an hour a day with things like preparing meals or bathing. Some clients require more care and may have 8-10 hour shifts, sometimes more. There are also live in cases available, where you stay with a client for several days at a time to ensure the best care is given. Being reliable • As a caregiver taking care of those in need, many people will rely on you. Your clients, your care manager, and even your fellow caregivers are all counting on you to be there. In some cases, clients can't do vital things like eat or bathe without your help, so it's important to be on time. If you ever have to miss a shift because of an emergency or sickness, you'll need to call in ahead of time to let someone know. With people depending on you, being reliable is a big part of the job. And finally, satisfaction! • Being a caregiver is a great opportunity to find satisfaction in your work. Bringing smiles to the faces of those in need is a great feeling. Getting to go home at the end of a long day's work and feeling like you made a difference - that's the best part of being a caregiver! I hope this video was helpful in seeing what it's like to live a day as a caregiver. You can search for caregiver jobs near you by going to myCNAjobs.com. Or if it's easier, you can give us a call to talk directly to a recruiter.
