How much does a Home Oxygen Concentrator Cost?

New home oxygen concentrators vary in pricing and usually cost between \$595 and \$2000 depending on batteries and other accessories. Customers can opt to purchase a used home oxygen concentrator, with prices that range from \$395 to \$1500 depending on the hours, warranty and condition of the unit. Always make sure you buy any secondhand oxygen therapy units or supplies from a reputable seller.

How Much Does Home Oxygen Cost? - HomeCare Magazine

According to the study, the average cost per patient, per month, for home oxygen therapy is \$201.20, with \$55.81 of that total for equipment and \$145.39 for services. "The study shows that, contrary to some perceptions, home oxygen therapy involves much more than a piece of equipment," said Tom Ryan, AAHomecare chairman and CEO of Homecare Concepts, Farmingdale, N.Y.

High Volume Oxygen -- How much does oxygen cost?

According to the data shown in the map above, the median price per K tank is \$20. Using that number, your cost for delivered oxygen will be \$60 per week plus delivery, tank rental, and hazmat charges that will amount to at least \$40 per week. That's $\$100 \times 52 = \$5,200$ per year for K-tanks.

Cost of Oxygen Concentrators - 2021 Healthcare Costs

Typical costs: An at-home oxygen concentrator costs between \$550 and \$2,000. These concentrators, such as the Optimum Oxygen Concentrator which has a manufacturer's list price of \$1,200-\$1,485 but sells for about \$630-\$840 on websites like Amazon, are heavier and bulkier than portable oxygen concentrators. The cost of at-home oxygen concentrators depends on the brand and the features.

How Much Does Oxygen Therapy Cost Without Insurance - The Art ...

Home oxygen: Oxygen concentrators are essential for long-term oxygen therapy, and they cost \$2500 on average; second-hand OCs are available for a lower price, around \$1400.

How Much Does Oxygen Cost? | HowMuchIsIt.org

According to an article on HomeCareMag.com, the average bill for oxygen services is usually around \$200 per month, with more than \$145 going toward services only. Swapping or refilling a tank at a local medical supplier, instead of having a professional coming to your home, can cost around \$10 to \$35.

Getting Started with a Home Oxygen Concentrator

A home oxygen concentrator is prescribed for patients who need constant oxygen while they are at home and/or asleep. In this video, we will explain the parts of home concentrators, how they work and how to take care of them. Always consult your doctor if you have questions about your oxygen therapy prescription and using your oxygen device. To learn more about oxygen therapy, visit Lung.org/oxygen. Home Oxygen Instructions for Coronavirus Patients

This instructional video explaining proper use of home oxygen equipment was one component of a program used by a Southern California health system in 2020 to manage acute care supply and demand during the early stages of the COVID-19 pandemic. Clinically stable patients with low-level oxygen requirements who could safely manage the equipment could be discharged to home or quarantine housing if • They were clinically stable and required at least 3 L per minute of nasal cannula oxygen to achieve at least 92% oxygen saturation • Processes were in place to ensure reliable equipment delivery and vendor access postdischarge, including stocking portable oxygen and pulse oximeters in the emergency department so patients could be sent home directly from the emergency department after hours without waiting until business hours the next day • Nurses with physician support if needed called within the first 12 to 18 hours postdischarge to follow up In an evaluation of the program, patients discharged under these conditions had low rates of mortality and return admission within 30 days of discharge.
