Insulation - types, features, and flaws

How to Insulate Walls and Ceilings -- by Home Repair Tutor

Do you hate being cold? It doesn't have to be that way. In fact: it's easy to make your home feel comfy. Today we show you how to insulate walls and ceilings. We use batt insulation from Johns Manville. My buddy Bill just built an addition. So we were lucky to have open walls and ceilings to show you our insulation tips. Here are 8 tips to help you get started with your insulation project: 1. Get your stud and joist dimensions 2. Choose an insulation type 3. Cut batt insulation to size 4. Make sure insulation fits tight against framing 5. Staple tabs (if present) on inside of framing 6. Tape any seams or torn kraft-faced insulation 7. Don't block air vents with ceiling insulation 8. Use spray foam around windows (specifically for windows) Check out the video for all the details and a sweet surprise at the end. youtu.be/nvDwXJLX074 Feel free to share this video with your friends either via email or on Facebook youtu.be/nvDwXJLX074 There's nothing better than helping a friend out with a DIY video that could make their project go a lot better. Spread the word about insulating by using the hashtag #winterwarrior Thanks for watching my video, take care, and see you in the next one!! Cheers, Jeff P.S. For the full written tutorial click this link homerepairtutor.com/how-to-insulate-walls-and-ceilings P.P.S. Music is by Spencer Snyder spencersnyder.com/

How does insulation work

We explain exactly how insulation works.

How to Beef Up Attic Insulation | This Old House

Cost-effective way to save energy with This Old House general contractor Tom Silva. (See below for a shopping list and tools.) SUBSCRIBE to This Old House: bit.ly/SubscribeThisOldHouse Tom helped a homeowner make his house more energy-efficient by adding insulation in the attic. Initially, the attic had only about two inches of "rock wool" insulation between the joists. First, Tom filled up the joist bays with loose "cellulose" insulation and raked it level with the tops of the joists. Tom then added even more insulation by laying fiberglass insulation batts over the cellulose and perpendicular to the joists. To allow the homeowner to store items in the attic, Tom built a raised platform out of framing lumber and insulated underneath the platform with fiberglass batts. Tools for Beefing Up Attic Insulation: - tape measure [amzn.to/2FswC14] - insulation knife [amzn.to/2RptXK4] - leaf rake [amzn.to/2Ni06FI], used to spread cellulose insulation - dust mask [amzn.to/2ISOmDq] - hammer [amzn.to/2Fp3xU6] - circular saw [amzn.to/2WRVh4Y] Shopping List for Beefing Up Attic Insulation: - cellulose insulation [amzn.to/2Fjt29p] - un-faced fiberglass insulation [amzn.to/2Y2rMi8] - 2x10s [amzn.to/2IUGvFC] for framing a storage platform - 7/16-inch-thick OSB - 16d nails [amzn.to/2IZcAMC] for nailing together 2x10s - 6d nails [amzn.to/2RtGJHE] for nailing down the OSB 2-inch-thick polystyrene [amzn.to/2N61kmI], used to cover subfloor Tom installed 2' x 4' batts of un-faced fiberglass insulation, 9.5 inches thick. It provides an R-value of 30 and is manufactured by Owens Corning (owenscorning.com/en-us). Both cellulose and fiberglass insulation can be purchased at most home centers and some building supply centers, such as KAMCO Supply Corp. of Boston (kamcoboston.com/) About Ask This Old House TV: Homeowners have a virtual truckload of questions for us on smaller projects, and we're ready to answer.
