After 3 trips to home depot I finally get a water heater that works..... I help them sort their bad stock and they treat me like ****

How to choose a Hot Water Heater - Costs & Warranty

► Costs to Install / Replace a Water Heater: remodelingcalculator.org/costs-install-hot-water-heater/ ► Water Heater Calculator: remodelingcalculator.org/water-heater-calculator/ ► Tankless Water Heater Calculator: remodelingcalculator.org/tankless-water-heater-cost-calculator/ ► Learn which water heater you should get - 6, 9 or 12 years warranty, Home Depot brand or from Plumbing Supply, etc. Water heaters are NOT expensive, but you should still do some research before going to home depot/lowe's and buying the cheapest or most expensive unit they have. There are certain things you need to know before choosing your water heater. Here we will just talk about TANK water heaters, leaving TANKLESS for

another video. First, I recommend that you get the longest warranty period possible. Each step will cost you about \$100. Warranties for Home Improvement stores go in 3 year increments, starting with 6. For example - a 6 year, 40 gallon gas water heater will cost about \$400. A 9 year 40 gallon will cost \$500 and a 12 year will be about \$580. So you may think - 50% (\$180-200) difference in upfront cost between 6 and 12 years, but also consider that at year 6, when you need to replace the cheap unit, you will also have to shell out \$700 for replacement labor. Also cost per year is \$67 for a 6 year unit and \$50 for a 12 year unit. In addition, a 12 year unit is more energy efficient, so you will save additional money on gas (or electricity). Now if you will definitely move within 5-6 years, then maybe you should go for a cheaper model. remodelingcalculator.org/
