How Much Does A Control4 Smart Home Really Cost

The most honest, transparent, no BS video we have EVER done. Literally taking you through pretty much every element of a Control4 smart home and explaining the costs. From design right through to aftercare. We even talk you through a few of our projects and explain how much the cost. We wanted to show people planning a project or self build that this level of smart home is possible with the correct budgeting - the most important part is getting that prewire in! I also wanted to show that despite the nature of what we do being so totally bespoke - there is a space for transparent and fair pricing and HNWI's shouldn't be extorted on these systems because of their wealth status or how many cars they have on the drive... So here it is, all the questions about what goes into a Control4 smart home and a breakdown of all the costs Chapters 0:00 Intro 4:37 How to contact Art of Smart Group LTD/ Initial consultation 6:57 AOS Showhomes 8:08 When do we need to be on site? 11:36 Design 12:45 Electrical Element 14:22 Pre-wire 16:10 Multi-room Audio 17:48 Video Distribution 21:05 Media Room/ Home Cinema 24:19 CCTV & Security 27:21 Lighting Control 29:57 Motion Sensors 30:43 WIFI & Network 32:25 Smart Heating 34:39 AC Controls 35:30 Curtains & Blinds 37:01 Renewable Energy 38:14 Touch Screens & Remotes 41:54 Video Intercoms 44:28 The Rack & Components 47:14 Service & After Care 51:43 AOS Case Study #1 52:47 AOS Case Study #2 54:05 AOS Case Study #3 55:02 AOS Case Study #4 56:05 AOS Case Study #5 57:53 AOS Case Study #6 59:57 Conclusion & Wrap-up ----- Ready to start planning your smart home?! How Much Does A Smart Home REALLY Cost in Electricity!

Buy a kill-a-watt meter here! Cheap and fun! amzn.to/2IqWrSk Like this video and all my others? Buy me a coffee buymeacoffee.com/thekmz1 Check out my amazon shop, periodically adding deals and products amazon.com/shop/thekmz1 In this video I use a kill-a-watt meter to measure how much power is being used by the entire rack. I then compute the yearly cost, which was a little surprising! I will be posting more statistics in the coming days, so stay tuned Security cameras being powered by PoE are using about 60 watts Some links used in this description may be affiliate links

The True Cost Of Your Smart Home

Today I'm asking the questions: How much does smart home technology cost in electricity? How much electricity does your computer use? How much electricity does a fan use? Is it a waste of money to have multiple smart home hubs? Google Home versus Amazon Echo, Harmony Hub versus Broadlink RM pro. Android set top box versus Raspberry Pi; Which device is costing you the most electric? This video also serves as a Teckin Smart Plug Review. The socket works with the Amazon Alexa Echo dot and Google Home, and IFTTT, but also works for Energy Monitoring and setting timers via the Smart Life app. Thanks to Teckin for sponsoring this video! The real cost of smart speakers

Alexa's recording you. What's she doing with it? Read Sara's article about the privacy settings on your smart speaker: vox.com/recode/2020/12/9/22160427/amazon-alexa-google-assistant-siri-holidays Correction: At 0:58, we mistakenly suggest that every 1 in 5 American households has a smart speaker. In fact, over one-third of U.S. adults has a smart speaker. We regret the error. In 2014, Amazon debuted a simple but industry-changing product: the smart speaker. Technically the Amazon Echo was just a microphone attached to the internet that you installed in your home. But it let users ask a digital assistant, Alexa, thousands of questions and commands, and it was a hit. Before long, Google and Apple followed with their own smart speakers, and today, a device that began as a curiosity has become commonplace: one in five US households now owns a smart speaker. Smart speakers offer convenience; much of their popularity can simply be chalked up to that. But tech companies are also clearly pushing the technology onto consumers hard, sometimes selling smart speakers at rock-bottom prices, and building the "listening" technology that drives them into all sorts of other products, from headphones to doorbells. And a big reason for that is all the data that they produce. Just like our web searches, online purchases, and social networks, every command you give to a smart speaker is a new piece of data that tech companies own. Most likely, your voice recordings are already being used for improving those companies' listening algorithms and ad targeting, but there's very little transparency and no way to know exactly how they use human voice data. All we really know is that these devices have enabled their manufacturers to collect gigantic troves of voice recordings — and that opting out of it isn't always easy.
